PROFESSIONAL SUMMARY

Bachelor's in Computer Science with hands-on experience in Flutter development and Python programming, along with exposure to AI/ML through academic research in cybersecurity. Passionate about building scalable software solutions and eager to continue learning AI technologies while solving real-world business challenges.

SKILLS

Languages and scripts: PHP, Python (Flask), C, Java (Spring), HTML, CSS, MATLAB, R, Spring Boot, LaTeX, WordPress, Elementor

Cloud Technologies: Microsoft CRM, Azure Kubernetes, Azure DevOps, Azure Monitor, Azure Virtual Machines, ADF

WORK EXPERIENCE

BroadAxis Inc (Feb 2026 – Present)

Full Stack Developer

Technology: WordPress, Elementor, Adobe Photoshop, CSS, HTML, Python, PHP, Claude Code

- Joined a fast moving startup as a core member of a small engineering team, taking ownership of the **full web development lifecycle** across 20+ projects spanning e-commerce, corporate, and portfolio builds using PHP, WordPress, Python, Elementor, CSS and MySQL.
- Integrated **AI-driven image generation** workflows into production using Midjourney and Adobe Firefly, reducing content turnaround time and enabling the team to deliver visually polished sites without external design bottlenecks.
- Developed **custom WordPress plugins** to handle complex data transfer and YMM (Year/Make/Model) mapping across a catalog of 60,000+ products while ensuring reliable mapping accuracy..

University Of Texas At Arlington (March 2025 – Dec 2025)

Cybersecurity Research Volunteer

- Supporting **cybersecurity curriculum development** under Dr Nadra Guizani by **testing course materials** and creating **tutorial-based content** for student organizations.
- Conducting **literature reviews** and analyzing **Google Scholar-based AI/ML implementations** to publish a **cybersecurity research paper**; supporting **academic writing, resource curation, and submission planning**.

Kshan Tech Soft Pvt LTD Pune, India (May 2024 – August 2024)

Flutter Developer Intern

Technology: Flutter, Dart, HTML, CSS

- Developed **responsive web pages** using **Flutter** and **Dart** as per client requirements. Added features like custom icons, login pages, and padding scrolling functionality to enhance user experience.
- Provided **cross-platform support by testing webpages** across Android, Windows and Linux

Viridium AI Seattle, WA (May 2023 – August 2023)

Software Developer Intern

Technology: MYSQL, Spring boot, Azure DevOps, GIT control

- Implemented **Azure data ingestion pipelines** for efficient data processing with the help of Azure Data Factory.
- Applied simple **ML techniques**, including **random forest** and **linear regression**, for valuable environmental sustainability insights.
- Developed **logging & monitoring framework** for site incidents using Spring boot (SLF4J, LOG4J).

PROJECTS

LSB Steganography Application | Languages Used: Flask, Python, GCP, Firestore

Jan 2024 – May 2024

- Built a full-stack web app allowing users to hide/retrieve messages in images.

Keypoint detection using HOG and SIFT | Languages Used: Python, Jupyter Notebook

Jan 2024 – May 2024

- Used SIFT and RANSAC for feature matching on CIFAR-10 dataset images.

Customer Spending Prediction Model | Languages Used: Python

Aug 2023 – Dec 2023

- Built a machine learning model using random forest regression to predict customer spending based on age, gender, and payment methods. Implemented in Python with scikit-learn and advanced data visualization.

EDUCATION

University of Texas at Arlington, Arlington, TX

Aug 2020 - Dec 2024

Bachelor of Science in Computer Science, Maverick Academic Scholar
